## WITH SNOW ON THE GROUND, PLEASE MAKE SURE TO:

- MARK YOUR METER
  - LOCATE YOUR MAIN SHUT OFF
  - FAMILIARIZE YOURSELF WITH YOUR PLUMBING SYSTEM
- EVERY SECOND COUNTS IN A WATER EMERGENCY!**

## Marking your outdoor water meter pit:

Mountain Regional Water requires that access to the meter pit be maintained by the homeowner. The meter pit should be accessible at all times. This will help us if we need to access your meter for maintenance or emergency shutoffs due to broken pipes and leaks. If you notice the meter lid is loose, ill-fitting, or missing, please contact us to report it.  
435-940-1916.

## TIPS:

- **Mark your meter pit with a cone or post.**
- **Keep your meter pit covered with snow to help insulate it.**

## WHAT TO DO IF YOUR PIPES ARE FROZEN

**Turn on faucets.** Allow a slight but steady stream of water to run through. Once thawed this will relieve pressure.

### Open your cabinets.

Allows warm air to circulate

### Increase the temperature in your home.

Warms pipes within the walls

### Apply heat to your pipes.

EXAMPLES: Wrap a heating pad around pipes, or apply hot towels to pipe.

## EYE ON WATER

Not just for leak alerts!

- Compare days, weeks, months, and even years of your usage.
- Monitor usage down to 15 min. increments!

# KEEP THEM CLEAR

In an emergency, every second counts.

- Remove snow and ice from hydrant
- Clear an area approximately 3 feet around hydrant
- Clear a path from the hydrant to the street

# 6

## WAYS TO PREVENT FROZEN PIPES

Keep garage doors closed

Seal doors and windows properly

Insulate your pipes

Keep thermostat above 55 degrees day and night

Act swiftly if you suspect trouble

Open kitchen cabinets
