Total Footage

### MUST CHOOSE EXISTING PIPE TYPE

Upgrade

Existing Meter

Meter Size Requesting:

3/4"    1"    1-1/2"    2"    3"

**Lead**  
A dull, silver-gray color that is easily scratched with a coin. Use a magnet - strong magnets will not cling to lead pipes.

#### Types of water pipes

Follow the guidance below or contact a licensed plumber to determine the material of your water pipes. To identify the material of your service pipe material on private property, check your household water service connection, typically located in the basement.

**Galvanized**  
A dull, silver-gray color. Use a magnet - strong magnets will typically cling to galvanized pipes.

**Copper**  
The color of a copper penny.

Homeowners should identify and replace old household pipes, particularly galvanized plumbing and sources of lead. The type of household plumbing can vary throughout your household.

**Plastic**  
White, rigid pipe that is joined to water supply piping with a clamp. Other colors might include: BLUE, BLACK, or GREEN

Are you installing a Fire Suppression System: YES NO

Are changing the existing irrigation in any way: YES NO

Are you installing a *WATER FEATURE*: YES NO  
(water features examples are: hot tub, spa, fountain, pool)

*If you have answered YES to any of these questions, you will need to install the appropriate Backflow Assembly and are required provide a test report and on-going annual test reports.*

If the current water meter is located inside the home/structure, the District may request the water meter be brought up to our current standards and relocated outside.

Mountain Regional Water District requires all new as well as remodeled residential and commercial connections to the district's current water infrastructure to follow uniform drawings, specifications, and standards. <https://www.mtregional.org/drawings-and-specifications>
